

Broiler Chicken

Bio Herbal Supplement

Broiler Chicken Bio Herbal Supplement is rich in antioxidant and antibacterial compounds. These herbal compounds in broiler chickens improve feed, daily weight gain, feed conversion ratio and environmental conditions (reduction of unpleasant odors and toxic gases). It improves the absorption of nutrients in poultry by increasing the length of the intestinal villi. Also, the use of this supplement in the poultry diet has improved the quality of the meat and prevented the oxidation of fats. Effective compounds found in these plants also control intestinal infections and enhance the function of the immune system

Some of Main Advantages of This Product:

- Increasing the growth rate and improving the feed conversion ratio
- Increasing the quality and quantity of meat and feathers
- Prevention of respiratory and infectious diseases and reduction of casualties
- Enhancing the immune system and immune response to pathogens
